Conclusion/Brief comment:

This application is to demolish the west rear section of the detached outbuilding, and to erect a one and a half storey extension linking the north of the main dwelling to the west of the outbuilding. In addition it is proposed to install a dormer window to the north roof slope of the west wing, install a rooflight to the west of the main roof slope, install an external staircase to the east (front) elevation of the once detached outbuilding, install cladding and undertake alterations to fenestration.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours, as the land slopes away to the west and any views from the new first floor windows will be long and far from any private amenity spaces.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
