Conclusion/Brief comment:

This application is to erect a one and a half storey and a single storey extension with a balcony to the south elevation, with the balcony facing west along with some alterations to the fenestration.

The proposals achieve a high standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on neighbouring properties because the nearest neighbour is over 33m away

and the boundaries of the site are made up of mature planting, which offers plenty of screening.

The balcony faces west across the agricultural land within the applicant's ownership/control and the site boundary in this direction is 68m away, meaning there are no overlooking issues from the balcony in any direction.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
