Conclusion/Brief comment:

This application is to erect a single storey flat roof extension to the west rear elevation and to replace the two first floor windows with inward opening doors and juliet balconies on the west elevation. The scheme also proposes altering the third floor dormer window to inward opening and creating a small balcony on the front east elevation with glazed balustrade.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation. The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Changing the rear first floor windows to juliet balconies is not considered to increase any overlooking, as the views from the windows will not alter, therefore the juliet balconies are considered acceptable in this instance and will not impact any of the neighbours.

The small balcony at third floor level on the front of the property will look out over the front of the properties, which are not considered private amenity spaces, the distance to the eastern boundary is over 12m and therefore there are no overlooking issues for any of the neighbours on the other side of the road.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
