Conclusion/Brief comment:

The building forms part of the St Peter Port Conservation Area hillside townscape. The St Peter Port Conservation Area Appraisal, Study of the Hillside Town sets out that the hillside townscape is characterised by a fenestration pattern that results in a vertical emphasis. In addition, it sets out that for small scale developments the vertical proportions of dormer windows should be maintained and that large/letter box dormer windows do not maintain the characteristic vertical proportions.

The proposal would result in the existing small dormers with a vertical emphasis replaced with a large/letter box dormer window with a horizontal emphasis. However, due to the orientation and height of the building and the siting and height of neighbouring buildings to the east, only a small section of the roof at its southern

end is visible in specific short and long range views from the harbour where it is seen between the roofs of neighbouring properties. As a result, the proposed large/letter box dormer window would only be partially glimpsed from a limited range of viewpoints within the harbour and it would have a limited impact on the wider hillside townscape. By virtue of the limited public views of the dormer window, the proposal would conserve the character and appearance of the Conservation Area, in accordance with Policy GP4.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

It is recommended that the application is approved.
