Conclusion/Brief comment:

This application is to replace the existing conservatory with a single storey flat roof extension and raise the boundary wall to 2m along the southwest and northwest rear boundaries.

Raising the height of the boundary wall as proposed would normally be considered exempt development, however, between the rear garden and the neighbouring rear gardens to the northwest is a small dourt, which is at a lower level than the garden

level. The proposed wall would be the same height as the existing fence and the northwest neighbour also has a rear fence and there is planting along the dourt. The proposed wall is considered to be acceptable.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
