Conclusion/Brief comment:

This application was to install replacement windows on the front south elevation, four on the ground floor and five on the first floor.

The application was deferred because the first floor windows were considered to be older than the ground floor windows, and are considered to make a positive contribution to the special interest of the building. They are considered to be repairable and their removal from the application was requested.

The application was subsequently revised to replace just the four ground floor windows, which are considered to be late 20th century. The replacement of the ground floor door is now also to be part of the application. Provided that the replacement windows and doors are of a suitable design the proposal would have no significant adverse effects on the special interest of the protected building.

The proposal to replace the ground floor windows and door is not considered to have any detrimental impact on the character and appearance of the surrounding area, nor will it impact on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
