Conclusion/Brief comment:

This application is to demolish the existing side extension and outbuilding, erect a new single storey extension to the west side elevation and install a replacement dormer window to south front roof slope, and erect an outbuilding to house a utility room and shower room along the west boundary and a summer house to north boundary.

Initially the application was also to widen the front roadside boundary wall to allow vehicular access, the application was deferred to ask for that element of the scheme to be removed as the property is within a conservation area and the reduction of roadside boundary walls is not encouraged. This element has since been removed.

The proposed flat roof side extension will replace the existing lean-to extension, giving a little more head room in the porch and bathroom. The front parapet wall of the extension is a traditional way of hiding the roof line from the front of the property and is considered to be appropriate and acceptable.

Both the outbuilding and the summerhouse are single storey, they are located to the rear of the property and are not considered to have any detrimental impacts on the character and appearance of the surrounding conservation area, nor will they have any adverse effects on neighbour amenity.

The replacement dormer window is also considered acceptable, and would not impact on the character and appearance of the surrounding conservation area, or affect neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
