OFFICER'S REPORT

Brief Description of the site:

The application site comprises a two storey mid-terrace property located to the west of Kings Road. The site is located in a Conservation Area and is in a Main Centre Outer Area as designated in the Island Development Plan.

Planning permission is sought to demolish a section of the roadside wall and railings to widen the vehicular access.

The proposed access will be centralised, and the width will be 4147mm.

It is proposed to install black painted metal 'gateposts' on either side of proposed opening to match neighbouring properties.

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

Centralising the vehicle access and increasing the width to 4147mm is a reasonable aspiration of the property owner whilst respecting the character and appearance of the Conservation Area when taking into account the total width of the access, and incorporating well detailed features such as the black painted metal railings and gate posts. The size and form of the proposed railings will match the existing as shown on drawing no. 449.300.

Consequently, the limited effect on the Conservation Area is outweighed by the degree of flexibility afforded to householder development.

The proposal will have no adverse effect on highway safety or traffic management.

Due to type of development proposed which involves widening a vehicular access, it is not considered necessary for the applicant to demonstrate that the proposal has been designed to take into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
