### Conclusion/Brief comment:

This application is to erect a 29.25sqm flat roof garden room to use as a studio, and a 7.2sqm flat roof greenhouse to replace the existing potting shed, both positioned to the rear east boundary of the site.

The proposals achieve a good standard of design, using materials which complement the existing materials. The garden room & greenhouse will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new structures are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

Grant with Conditions
