Conclusion/Brief comment:

This application is to demolish the existing outbuilding and to erect a single storey flat roof extension with raised terrace to the south (rear) elevation, plus some alterations to the fenestration and widening the existing vehicular access by approximately 500mm to 4.2m.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

Due to the rear location, the scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area. The proposals are not considered to have any impacts on either of the immediate neighbours due to there being no windows and a 1.8m high privacy terrace screen to the west elevation, and a 1.8m boundary wall along part of the east elevation to prevent overlooking.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
