Conclusion/Brief comment:

This application is to erect a single storey extension to the front (east) elevation to house a study and a single storey extension to the rear (west) elevation to extend the lounge/diner. In addition the scheme proposes to install a second floor gable window on the rear (west) elevation.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extensions will provide adequate

levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extensions are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours. The high level second floor window is servicing a store rather than a habitable room, and the distances to the boundaries either side are enough not to warrant any overlooking.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
