### Conclusion/Brief comment:

This application is to demolish the rear extension and outbuildings and erect a single storey pitched roof rear extension in their place and erect two sheds to the south of the dwelling.

The new extension will house an open plan kitchen, diner, lounge, with a utility room, bathroom and hall. The footprint and scale and massing of the extension are

only slightly larger than the existing workshops, allowing solar panels to be fitted to the south roof slope.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on the immediate attached neighbour as all the openings face away from the neighbouring property. Any resulting overshadowing would not be so significant to warrant the refusal of planning permission.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
