OFFICER'S REPORT

Site Description:

The property known as 'Elhanan' is a 1980's detached one and a half storey dwelling which is set back from and faces southeast onto Clos de Coin. There are other detached dwellings in each direction. The property is located Outside of the Centres as defined in the Island Development Plan.

Relevant History:

There is no relevant history pertaining to this application.

Existing Use(s):

Residential use class 1: dwelling house.

Brief Description of Development:

This application is to erect a first floor extension over the existing flat roof garage with a covered area at ground floor to the northeast elevation.

Relevant Policies of any Plan, Subject Plan or Local Planning Brief:

GP8: Design

GP9: Sustainable Development

GP13: Householder Development

Representations:

There has been one letter of representation and the issues are;

- The neighbours who live in a bungalow immediately behind this property believe it would create a property, which has already been extended, out of all proportion with the surrounding properties. Most of the properties are bungalows and to create this vast property will devalue others around it, and affect the quality of life of the surrounding residents who are mostly older and with no young families.

Consultations:

None

Summary of Issues:

- Design of the development.
- Impact of the development on the character and appearance of the area.
- Impact of the development on neighbouring properties.

Assessment against:

1 - Purposes of the law.

The objectives of the Law, as set out in Section 1(2), have been considered and this forms part of the assessment of policy issues as set out in 2 below.

2 - Relevant policies of any Plan, Subject Plan or Local Planning Brief.

The proposals are a modest design which would create a fourth bedroom at first floor over the garage. The new dormer window faces southeast over the front driveway and close road, which avoids overlooking any neighbours amenity space.

The proposals are considered achieve a good standard of design, they are subservient to the main dwelling and use materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impacts on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

A planning history search has been carried out and the dwelling has never applied for an extension before and is, at present, exactly how it was constructed in the 1980's.

3 - General material considerations set out in the General Provisions Ordinance.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application. Where relevant the issues are considered in section 2 above.

4 - Additional considerations (for protected trees, monuments, buildings and/or SSS's).

The proposal would have no impact on Protected Buildings, Trees or Monuments or on SSS's.
