Conclusion/Brief comment:

This application is to install rooflights to the north roof slope and alter the fenestration of the outbuilding to create a dower unit, plus erect a summerhouse to the northwest boundary.

The outbuilding is attached on the east side by the outbuilding belonging to the attached neighbour, both outbuildings are located to the south of the attached neighbour's property, with the east elevation of the proposed dower close to the north elevation of the property.

The dower unit will provide a kitchenette/lounge, one bedroom and bathroom, all the utility bill will be paid by the owners of La Manoir Villa. The dower unit is well related to the main dwelling and will share laundry facilities, parking and the garden. The majority of meals will be provided by the main dwelling.

The proposals to alter the fenestration and add rooflights to the north roof slope are considered to be appropriate, they are considered to achieve a good standard of design. The new dower will provide adequate levels of sunshine and daylight, and give the occupiers flexible and adaptable accommodation.

The proposals, including the summerhouse, are not considered to have any detrimental impacts on the character and amenity of the surrounding area, nor will they have any adverse effects on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
