Conclusion/Brief comment:

This application is to install a cabrio rooflight to the north rear roof slope and a rooflight to the south front roof slope to create an additional bedroom.

The rooflight at the front of the property is not considered to have any impacts on the character of the surrounding area, nor would it have any impacts on neighbour amenity.

The rear cabrio rooflight is a little bigger and can open to form an internal mini balcony. There is always going to be an element of mutual overlooking in terraced properties, as already exists from the first floor windows. The rear gardens in this group of dwellings are all very small, and close to the rear elevation. The cabrio rooflight will give longer views over the car parking area and high wall which screens the lower terraces.

In this instance the addition of a cabrio rooflights is not thought to have any detrimental impacts to the neighbouring properties and would not impact the character of the area.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
