Conclusion/Brief comment:

This application is to erect a single storey flat roof extension to the rear and add a flat roof dormer across the rear roofslope.

The existing single storey lean-to extension will be rebuilt with some rooflights and the additional flat roof extension will be added to provide a large open plan kitchen/diner and lounge, the dormer will provide two ensuite bathrooms for the two first floor bedrooms.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding Conservation Area, nor will it have any impact on either of the immediate neighbours.

The Island Development Plan supports efficient use of land, stating that multi-level buildings are to be encouraged, therefore adding the dormer to the rear of the property is considered acceptable. The windows are to service two ensuite bathrooms and so the glazing will be obscured, to prevent overlooking and for privacy. This is a matter that can be controlled by planning condition.

The rear dormer is not considered to have any detrimental impacts on the character and appearance of the Conservation Area, nor will it affect any neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
