Conclusion/Brief comment:

This application is to erect a 1.8m high timber fence along the west side of the rear garden in line with the west elevation of the property and the garden shed (inset from the west site boundary) and along the rear south boundary between the shed and the east boundary.

The west and north boundaries already have a 0.9m high timber picket fence around the side garden. The reason for the higher fence between the property and the shed is to enclose the rear garden area from the access road for the occupant's safety and privacy.

Taking into account the set back from the road, level with the building line of the dwelling, the character of the area and the reasons specified in the application, the additional fencing is considered to be appropriate and acceptable.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
