The Authority does not recognise all of the land outlined on the submitted plan as forming the domestic curtilage associated with the dwelling presently known as Le Douit Marin.

OFFICER'S REPORT

Brief Description of the site:

The application site is located outside of the Centres and within an Agriculture Priority Area as designated in the Island Development Plan.

The property comprises a detached 1.5 storey dwelling-house fronting onto Les Poidevins and features pitched roof dormer windows to the rear.

Planning permission is sought to install two replacement catslide dormer windows to the west (rear) elevation. The dormers will be cladded in horizontal cladding, although no details have been shown on the drawings submitted. These details are to be selected by the applicant in the future.

It is noted that the existing elevation plans that accompany the submission do not show the existing pitched roof dormers to the west roofslope that are proposed to be replaced.

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The replacement dormers adopt a good standard of design in terms of their size, proportionality and position in relation to the roof slope and the existing fenestration.

Whilst no details of the proposed horizontal cladding have been shown on the drawings submitted, the IDP adopts a degree of flexibility with regards to design aspects. It is therefore not considered necessary or reasonable to attach such condition to the decision when taking into account the size of the dormer cheeks, the distance to public vantage points, and that the property is not a protected building, nor is it sited within a Conservation Area.

Consequently, the proposal will not have a detrimental impact on the character of the area, visual amenity, or the amenities of neighbouring residents.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

An informative regarding the domestic curtilage associated with the dwelling should be attached to the decision to notify the applicant that the entire site is not currently recognised as domestic garden.

Based on the above, the application is considered compliant with the relevant Island Development Plan policies, accords with the purpose of the Law, and the requirements of the material considerations; it is therefore recommended that planning permission be granted, subject to conditions.
