Conclusion/Brief comment:

This application is to alter the bay window to create a balcony at first floor and install a new window at first floor to the south front elevation. The application also shows a change to the rear ground floor doors, however this would be exempt work and so will not be discussed in the report.

The east end cottage was built with a different roof line so has always been different to the other three cottages. The cottage to the west has remained the same as it was

first constructed, the application cottage has had the bay window added at some point and the adjacent cottage to the east has had an enclosed porch added over the front door.

All the cottages now look very different to each other which is why the proposals are not considered to have any detrimental impact to the character or symmetry of the row of cottages or on the character and appearance of the surrounding area. The proposals represent a good standard of design.

The balcony would not impact any neighbour amenity because it is located at the front of the property and only overlooks the public front parking area rather than any private amenity spaces.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
