Conclusion/Brief comment:

This application is to erect a single storey pitched roof pool room/store to the northeast of the property, just east of the existing pool. Initially the application was

deferred because some of the building was located on agricultural land, the structure has since been relocated a few metres to the west, to sit wholly within the recognised curtilage.

The building will have granite gables, a timber frame and pantile roof to match the existing structures on site. The 12m x 7m pool room will be located outside of the conservation area and within the domestic curtilage.

The pool room will be located close to the existing pool within the cluster of existing buildings. Due to the location the pool room will not be seen from any public vantage points. It is also over 13m away from the nearest site boundary.

The proposals are considered to achieve a good standard of design, using materials which complement the existing buildings. The pool room will provide adequate levels of sunshine and daylight, and give the users flexible and adaptable accommodation.

The scale and massing of the new building is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impacts on any of the immediate neighbours.

The associated additional hard landscaping is also considered to be appropriate.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
