Conclusion/Brief comment:

This application is to demolish the existing rear extensions and erect a two storey flat roof extension and a single storey flat roof extension to the rear. The ground floor extension will house a utility/wet room, a day room and a fourth bedroom, the first floor extension will house a family bathroom.

The adjoining semi-detached dwelling already has a two storey flat roof extension and the proposed flat roof extension will align with the neighbouring extension, which will lessen any impact. All proposals are to the rear of the property.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extensions will provide adequate

levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extensions are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
