Conclusion/Brief comment:

The proposed works include alterations to the front and rear of the building to remove the existing dormers and pitched roof, replacing with aluminium glazed screens with flat roof over, to increase the floor area at third floor.

Works also include a replacement roller shutter to the underground parking access, replacement front door with additional lower step to improve access. The external front planter is also to be refurbished.

The works to remove the dormers and introduce a flat roof are acceptable in relation to the Conservation Area and the appearance of the building in the streetscene. The proposed design creates a similar appearance to the existing mansard roofs of the neighbouring properties, and does not harm the special interest of the Conservation Area in wider views from the road.

The replacement roller shutter, door and works to the step and planter are also considered acceptable and will not result in a harmful impact in terms of design, amenity or with regard to the setting of the Conservation Area.

The alterations proposed are supported by and satisfy Policy OC4(A).

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
