Conclusion/Brief comment:

This application is to install three rooflights to the front north roof slope, three rooflights to the rear south roof slope and two windows on the east gable wall to

serve a new second floor lounge. The apex of the east gable will also be glazed to allow more light into a mezzanine level above the second floor lounge.

The mezzanine will be against the western gable wall, which means there will be no access to the apex glazing, and therefore no overlooking from this window. The second floor gable windows will be fitted with obscure glazing to prevent overlooking into the easterly neighbours private amenity space, this will be controlled by condition.

The proposals are considered to be appropriate and are not considered to have any detrimental impacts on the character and appearance of the surrounding area, nor will the proposals have any adverse effects of any neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
