Conclusion/Brief comment:

This application is to partially demolish the existing glazed café, which is located on the south elevation. The proposal is to replace the existing glazed structure, reusing the existing dwarf walls and replacing the glazing and roof, and adding a glazed porch to the south elevation of the café.

The proposals achieve a good standard of design, using materials which complement the existing materials. The replacement will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation due to the increase in thermal performance.

The scale and massing of the new porch is not considered to have a detrimental effect on the café or on the character and amenity of the surrounding conservation area, nor will the proposals have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
