Conclusion/Brief comment:

This application is to extend at ground floor to house an open plan kitchen/lounge/diner with utility room and WC. At first floor level the proposal is to enlarge the central existing flat roof element of the dwelling eastward to allow for a dressing room and ensuite, which will serve the master bedroom.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extensions will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new ground floor extension is not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will it have any impact on either of the immediate neighbours.

The property already has a first floor flat roof element at the rear of the property, extending it eastward by 3.5m is not considered to have any detrimental impacts on the character and appearance of the surrounding conservation area, nor will it have any overlooking impacts on the neighbours as the new proposed window will be serving a bathroom. A condition will be added to ensure the window has obscure glazing. The window will be a top hung fan light.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
