### Conclusion/Brief comment:

This application is to erect a single storey pitched roof extension (6m x 3.2m) to the west rear side of the garage.

The store will be attached to the back of the garage, but will have a separate entrance from the south and will be used as an equipment store. The store will be much smaller than the garage and so will be subservient to the garage and the dwelling. The store will not be seen from any public vantage points.

The proposals achieve a good standard of design, using materials which complement the existing materials. The store will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation within the outbuildings.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

Grant with Conditions
