Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The proposed extension adopts a good standard of design by virtue of its scale, form, massing, siting and materials. Due to its position and design, the proposal will not have a detrimental impact on the character of the area, visual amenity, or the amenities of neighbouring residents.

Whilst the dormer window is likely to result in some overlooking towards the neighbouring garden to the west of the application site, the degree of harm will be limited when taking into account the width of the dormer, the distance to the west boundary (circa. 13m), and that it will serve a staircase. By comparison, the dormer is only marginally larger than that permitted under the Exemptions Ordinance, 2023.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies, and accords with the purpose of the Law and the Material Planning Considerations. It is therefore recommended that planning permission be granted, subject to conditions.
