Conclusion/Brief comment:

This application is to demolish the existing rear conservatory, extend and alter at lower ground floor level and extend first floor terrace to north elevation. With the demolition of the conservatory comes the infilling of the indoor swimming pool. The existing first floor terrace will be retained and underneath it will be walled in as a smaller ground floor footprint, housing a garden room and an extension to one of the bedrooms. The first floor terrace will be extended over the new bedroom extension.

The proposals will reduce the internal footprint and extend the area of garden and outside space, by retaining the existing terrace and using it to inform the design.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable internal accommodation.

The scale and massing of the new extension is not considered to have a detrimental effects on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
