OFFICER'S REPORT

Brief Description of the site:

The application site comprises a detached dwelling located to the west of Rue Des Huriaux. The property is located in an Agriculture Priority Area and is outside of the Centres as designated in the Island Development Plan. The north elevation currently features two dormer windows and a gable end window at first floor level.

Planning permission is sought to install a Juliet balcony at first floor level to the north (side) elevation. The balcony will be formed by demolishing the wall below the existing window and installing double doors. The door frame is to match the colour and style of the existing windows, with the size of the proposed opening being 1950mm x 2050mm.

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

The proposal adopts a good standard of design by virtue of its size, materials and appearance. The proposal will not have a detrimental impact on the character of the area or visual amenity.

Careful consideration has been afforded to the likely effect of the development on the amenities of neighbouring residents. Whilst the proposal will increase the extent of overlooking towards neighbouring residents to the north, the degree of harm is not considered to be so substantial to rebut the general support in favour of householder development (Policy GP13) to warrant refusal. This decision has been reached when taking into account the existing overlooking relationship and the distance between the proposed opening to the neighbouring property to the north, which is separated by an agricultural field. Furthermore, the proposal seeks to increase the size of an existing window, and two dormer windows already face towards a neighbouring property known as Half Acre. Consequently, any additional overlooking will not cause significant harm.

Whilst the width of the Juliet balcony on the annotated photograph doesn't appear to be accurate as it is less than the width of the opening, this can be managed by condition.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies, and accords with the purpose of the Law and the Material Planning Considerations. It is therefore recommended that planning permission be granted, subject to conditions.
