Conclusion/Brief comment:

This application is to erect a ground floor flat roof extension, filling in the southwest corner of the property, housing a lounge/diner and to add a first floor dormer to the rear roof slope to house the master bedroom dressing room and ensuite.

All the proposals are to the rear of the property and therefore will not be seen from any public vantage points. The new first floor windows face south-west and will look over the property's rear garden. There may be a slight possibility that there will be some oblique views into the neighbour's garden, but the distance is over 10m and so any overlooking is not considered to be an issue.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
