Conclusion/Brief comment:

This is a partial retrospective application which relates to the demolition of the existing and erection of a new extension to the rear (southeast) of the dwelling. The foundations and beginnings of the walls have already been built and part of the existing earthbank has been removed to allow the construction of the extension.

Initially on the roadside of the previous existing extension was a small low earthbank, which partially screened the wall of the extension, preventing the building from appearing bulky, as the gable of the outbuilding is located right on the roadside.

The plans show the new extension roadside wall set 300mm in from the existing gable, which should have left enough room to replace a small amount of planting. Unfortunately the road has been resurfaced up to the new wall, which means the space for any planting has been eliminated. Although having the ability to screen the new extension would have been of benefit the omission of replacement roadside planting is not considered sufficient to warrant a refusal (the drawing note referring to the replacement planting has been struck through by the Planning Service).

Aside this, the proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

A condition will be added to ensure the earthbank beyond the extension will be reinstated once the construction has been completed.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
