OFFICER'S REPORT

Brief Description of the site:

The application site known as La Cachette consists of a detached dwelling located in extensive grounds. The property fronts onto Rue Des Fosses, and features a detached garage and packing shed to the rear of the house. The whole of the site is recognised as domestic curtilage.

Planning permission is sought to demolish a pitched roof extension, and erect single storey flat roof extension to the south (side) elevation.

The extension will serve as a breakfast room and a day room, and will be finished in timber effect cladding, white uPVC fenestration and an Alkor flat roof.

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

The application site does not contain a protected building, nor is it sited within a Conservation Area.

The proposed flat roof extension adopts a good standard of design by virtue of its scale, form, siting and materials. Whilst the length of the flat roof extension is large and extends across the majority of the south elevation of the main house which increases its 'visual' mass and bulk, the proposal is not considered to have a detrimental effect on the character of the area, visual amenity, or the amenities of neighbouring residents.

In addition, the roadside boundary consists of a hedge bank which will help to screen the development from public vantage points.

All other alterations are acceptable under Policy.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies, and accords with the purpose of the Law and the Material Planning Considerations. It is therefore recommended that planning permission be granted, subject to conditions.
