OFFICER'S REPORT

Brief Description of the site:

The application relates to the replacement of roof lanterns at Guille-Alles Library with roof lights.

The application has been accompanied by a statement of significance.

The site is located in a Main Centre, Conservation Area, Core Retail Area and Archaeological Area as designated in the Island Development Plan. The property is also a Protected Building.

Relevant History:

Pre-application advice was sought in this case. Advice was given indicating that there would be scope for the removal of the existing units but noting that they are a feature of the building, installed 30 years ago as a traditional style replacement of roof lanterns visible in early aerial photographs and visible in the public realm. Concerns were expressed about the removal of traditional lanterns with rooflights in terms of high standard of design and the impact on the Conservation Area and Protected Building. It was recommended that traditional lanterns were used or that appropriate supporting information be provided as to why the lanterns have been considered and discounted.
