Policies considered most relevant:

GP4- Conservation Area

GP8 – Design

GP9 – Sustainable development

IP6- Transport Infrastructure

MC10 – Harbour Action Area

Conclusion/Brief comment:

Policy GP8: Design seeks to ensure new development achieves a good standard of design whilst GP4: Conservation Areas seeks to ensure development conserves the special interest of the conservation area. Development should seek to limit its environmental impact and to provide accessible developments which include making provision for occupiers to travel by bike, motorbike or on foot.

The provision of additional covered and non-covered cycle parking within this public car park accords with the aims of Policy GP8 and IP6: Transport, Infrastructure and Support Services, as the development makes provision for the use of alternative, environmentally friendly travel thereby limiting the environmental impact of travelling around the island.

The height and design of the covered shelter is consistent with others found in the vicinity and is considered to represent a satisfactory standard of design given the location of the site within a conservation area.

There are no adjoining residential occupiers and the cycle parking would not have an adverse impact on the setting of the wider conservation area, in accordance with GP4.

The proposal does not impact on the Harbour Action Area with regard to Policy MC10 of the Island Development Plan.

In view of the above it is recommended that planning permission is granted for the proposed development.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
