Conclusion/Brief comment:

This application is to remove the two chimneys, replace all windows (including the dormer windows) on the front elevation with uPVC replicas, replace the large central window with a door (as it would have been originally) and install a new central rooflight. Plus install three rooflights on the rear roof slope, replacing 2 skylights.

Although the front façade of the property is original, this is the only original fabric remaining and the building is not listed. The site is not located within a conservation area, and the proposed could therefore be subject to change. Removing the chimneys and replacing the windows, with the same means of opening, are not

proposals which are considered to have any adverse impacts on the character and appearance of the surrounding area.

Replacing the large front central window with a door, will bring the front façade back to a functioning front elevation. The addition of a large rooflight in between the dormers is also not considered to have any detrimental impacts on the character and appearance of the surrounding area. None of the proposals will have any adverse impacts on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
