Conclusion/Brief comment:

Planning permission is sought for a variation to a previously approved scheme, to install an additional dormer window to the south-east elevation of the approved outbuilding/dower unit.

The principle of the dower unit was established in the assessment of the previous application and the additional useable floorspace created through the proposed dormer is limited and would not trigger the need to further assess the principle of the development.

The variations proposed are in-keeping with the design of the approved scheme and would not cause a detriment to the visual character or appearance of the surrounding area. The dormer has been positioned to face within the application site and would face towards the garden area of the property and a vinery site circa 10m beyond. The scheme would therefore not negatively affect the amenities afforded to the occupiers of any neighbouring residential properties regarding overshadowing or privacy.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

For these reasons the proposed variation to the original planning approval is considered to be acceptable.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
