Representations:

There has been one letter of representation and the issues are:

'We wish to raise our deepest concern with regard to this application with regard to our rights as owners of a property behind the proposed development.

You recently approved a similar application a few houses further down the road called La Rochelle Villa purchased by Ivy Developments. Without any conditions by yourselves to protect the owners of properties on the Clos des Petite Maison this demolished house had a right of way to the rear of the property of the Clos, BUT NO PARKING. We have had no end of problems with contractors parking and being abusive even though they know they have no right to park on the Clos. We are as you must appreciate very concerned that you did not look well enough at that application to make restrictions with regard to contractors and hope that there is some proviso to protect us from another contractor (this one has no right of access whatsoever over the private clos.'

Consultations:

None

Summary of Issues:

- Design of the development.
- Impact of the development on the character and appearance of the area.
- Impact of the development on neighbouring properties.

Assessment against:

1 - Purposes of the law.

The objectives of the Law, as set out in Section 1(2), have been considered and this forms part of the assessment of policy issues as set out in 2 below.

2 - Relevant policies of any Plan, Subject Plan or Local Planning Brief.

The proposals are to be single storey flat roof extensions, they are thought to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

Unfortunately Planning Law and the Material Considerations do not cover the process of building the structures, how a contractor works and where the contractor parks etc are issues are considered to be civil matters, which are covered by advocates.

3 - General material considerations set out in the General Provisions Ordinance.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application. Where relevant the issues are considered in section 2 above.

4 - Additional considerations (for protected trees, monuments, buildings and/or SSS's).

The proposal would have no impact on Protected Buildings, Trees or Monuments or on SSS's.
