Conclusion/Brief comment:

This application is to remove a 4.5m section of roadside south boundary wall to insert a seven bar braced galvanised steel agricultural gate. This is to allow access twice a year to cut the field and carry out maintenance. The land has been gifted to

the National Trust Guernsey and is to be retained as an agricultural field to continue to support biodiversity in the north of the island.

The field used to have access from one of the residential properties to the west, but with a change in ownership that access has now been blocked up, meaning the new gate will be the only access to and from the site.

The gate is considered to be a purpose which is ancillary to the main use of the field, as the land could not be maintained without it. The scale and size of the opening is considered appropriate to allow appropriate vehicles onto the site.

The proposals are considered to respect the character of the area, the gate will match the existing gate at the opening of the adjacent field, and would not result in the unacceptable loss of any distinct features.

Les Rocques Barrees Road is a Local Circulation Route, which has lower traffic flows with limited through traffic. The proposed opening is almost central on the south boundary and will have good sightlines (at least 33m) in each direction, the site is located on a long straight section of the road. Therefore IP9 is complied with.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
