Conclusion/Brief comment:

This application is to remove a section of granite boundary wall and install a pedestrian gate for maintenance and bicycle parking.

During the course of consideration the application was deferred due to concerns about the design and materials of the originally proposed solid timber gate. Revised plans have subsequently been submitted for a black metal picket gate with finial detailing.

The revised design respects the character and appearance of the surrounding Conservation Area. The insertion of a pedestrian gate in this location is considered appropriate because it is encouraging sustainability travel, and the amount of granite wall being lost is not considered to have any detrimental impacts on the surrounding Conservation Area, or on the setting of the protected buildings.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
