Conclusion/Brief comment:

This application is to demolish and rebuild the chimney to the east elevation (this element of the proposals is retrospective), some remedial works to both gable parapets and replacing the dormer window with a new timber unit.

Initially the replacement window had been noted as uPVC, but the property is a Protected Building and it was not considered to be an appropriate material for the property. The application was deferred and the drawings have been changed to show a timber window instead, which is much more in keeping with the age and style of the property. In accordance with the revised details, this aspect of the proposal complies with policy GP5.

The chimney has been rebuilt with the same materials, style and design to match the previous chimney to respect the special interest of the protected building and complies with Policy GP5.

The installation of lead capping to the gable parapets also meets GP5, subject to a condition requiring this to be installed in accordance with LSA (Lead Sheet Association) standards.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
