Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

Whilst it is acknowledged that the existing building consists of art deco building, constructed before 1938, based on orthophotographs, and possesses some architectural merit and historic interest, the building is not a protected building, nor is it situated within a Conservation Area.

In this case, whilst regrettable, there is no requirement under Policy to retain the original roof form of the building. The general support under Policy GP13 and GP8 enables householders to exert a degree of personal choice with regards to design matters in areas less sensitive to change. Moreover, the character of the area consists of a mix of different architectural styles, forms and designs in which the proposed development would sit comfortably within. The proposal would have a negligible effect on visual amenity when viewed in context with the surrounding area.

Despite increasing the height of the building, the orientation, relationship and the shallow pitch of the proposed roof is such that the proposal would not lead to any additional shadowing effect that would be significant to rebut the support in favour of householder development (Policy GP13).

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies, and accords with the purpose of the Law and the Material Planning Considerations. It is therefore recommended that planning permission be granted, subject to conditions.
