Conclusion/Brief comment:

Planning permission is sought to erect individual portacabins grouped together to create a new storage cabin to be used for storage in connection with the Duty Free shop within the main airport terminal building. The proposed building will be of single storey construction totalling 69m² floorspace.

Policy IP4 states that: *"Proposals relating to the operation or safety of the airport will be supported where it would ensure the continued effective, efficient and safe operation of the airport"*.

Situated adjacent to an identical building to the east and positioned so as not to impede vehicular access between the area separating the main terminal building and the airport control tower, the proposal is considered to continue the effective and efficient safe operation of the airport for the purposes of Policy IP4.

The design will be consistent with the building to the east and will be seen in context with the existing built form to the west and south. The proposal therefore provides a good standard of design for the purposes of Policy GP8.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
