OFFICER'S REPORT

Brief Description:

The application relates to the installation of hardstanding to form a pathway to the south of Le Platon Home, along the south and east boundaries. The path has a concrete finish.

The application was deferred to ensure that the drawings clearly show the area of the site/materials proposed to which this application relates and to address Policy GP9: Sustainable Design. As amended, the submission clarifies that the path has a brushed concrete finish which aids residents with mobility issues when accessing the greenhouse. There is no evidence that this path, which has been in situ for sometime, would impact on flooding.

The site is located in a Main Centre, Conservation Area and Archaeological Area as designated in the Island Development Plan.

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

The pathway will not have an unacceptable adverse impact on the character and appearance of the Conservation Area or the setting of the Protected Building. The application submission has not, despite deferral, specifically addressed the matter of sustainable design in relation to the path as the information, on the whole, generic. It is acknowledged however, that the surfacing has been chosen with specific users in mind which would accord with Policy GP8 (access for people of all ages and abilities). Although a permeable surface has not been chosen the path is positioned within a garden and area of soft landscaping which can accommodate surface water run off associated with this path, without impact beyond the site.

The application is acceptable in relation to the above policies and other material planning considerations.
