Conclusion/Brief comment:

This application is to replace the five south facing front windows and the west facing side door.

The side door is a modern uPVC door, which is to be replaced 'like for like'. The existing front windows are aluminium and the proposed new windows are to be uPVC. Initially the proposed windows had very thick frames and so the application was deferred to allow the applicants address these concerns. Revisions have been provided showing a thinner profile for the windows.

As the windows and the door have already been replaced with modern materials, and despite the fact uPVC does not enhance the overall appearance of the protected building, the proposals will not impact on the special interest of the dwelling, therefore the use of uPVC in this instance is considered acceptable.

The scale and massing of the proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impacts on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
