ADVICE AND OTHER REMARKS:-

For the avoidance of doubt, this decision permits the erection of an extension to be used as an integral part of and incidental to the principal dwelling presently known as Somerset House. It does not permit the creation of a separately occupied annex or an independent dwelling. This would require a separate grant of planning permission and involve different planning policy considerations.

- (3) Any conditions subject to which planning permission is issued are enforceable in accordance with the provisions of Part V of the Law.
- (4) Planning permission for the erection of a building is only permission to use it for the purpose specified in the permission or, subject to any restriction so specified, for any other purpose for which it is designed.

(5) Planning permission is only permission to carry out the development specified in it (subject to any conditions so specified), and does not imply the giving of any other approval or consent required under this Law or any other enactment or under any rule of law.

Right of appeal against planning decisions:

Your attention is drawn to the provisions of Section 68(1) of the Land Planning and Development (Guernsey) Law 2005, which provides a right of appeal, on the merits against a decision to grant planning permission subject to conditions (except a building condition), to the Planning Tribunal, which is independent of the States of Guernsey. Conclusion/Brief comment:

This application is to demolish the existing sheds, erect a single storey flat roof extension to the southeast elevation to house a dower unit.

The proposed dower unit will comprise a bedroom, bathroom and kitchenette/living area at ground floor with access to the main dwelling through a shared utility room. In support of the application the applicant's agent by letter (dated 01/03/24) has confirmed that the dower unit will be used for a purpose ancillary to the main use of the dwelling house by the applicant's elderly father, who has diabetes and a heart condition. The letter confirms that the garden space, utilities and laundry facilities will all be shared with the occupiers of the main dwelling and that main meals will be taken in the main dwelling.

The suitable floor space of the dower unit, the relationship of the occupiers of the dower unit and the principal dwelling, the nature of use and facilities to be shared indicate that the additional accommodation would be subsidiary to and dependent upon the principal dwelling unit. In addition, the size and layout of the site and the relationship between the principal dwelling and the extension would not enable the site to be easily subdivided without compromising the amenity of both the extension and the principal dwelling.

It is recommended that for the avoidance of any doubt an informative is included on any permission to ensure that the accommodation provided remains ancillary to the main dwellinghouse.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
