Conclusion/Brief comment:

This application is a variation to a previously approved application, FULL/2023/1570, initially to create an additional pedestrian access and barriers to east boundary. The original approved plans showed the additional vehicular access with a pedestrian access directly to the north, the new proposed plans added a second pedestrian access 5m to the south of the additional vehicular access.

The applicants were asked whether or not they actually needed the two pedestrian accesses along the east boundary, and whether or not the entrance to the north of the new opening could be omitted.

It was agreed that the new pedestrian access, 5m to the south of the vehicular access, which will be in line with new the road crossing to the new bus stop, would be sufficient and that the original pedestrian access to the north of the new vehicular access could be omitted.

The new pedestrian access will have barriers to prevent users from running into the road, the access is now further away from the vehicular access and is now considered to be a safer and more practical solution for pedestrians to reach the bus stop.

The changes in the design are not considered to have any detrimental impacts on the character and appearance of the surrounding area, nor will they have any adverse impacts on neighbour amenity.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
