Conclusion/Brief comment:

This application is to demolish the extension and install a large rear dormer and a replacement catslide dormer to the front roof slope with a rooflight and some other alterations to the fenestration.

Initially the proposal was to insert a captains dormer to the front elevation, however, the rest of the terrace does not have captains dormers and so it did not fit in with the rest of the terrace or within the conservation area, the application was deferred to enable the applicant to change the plans.

The captains dormer has now been omitted and a replacement catslide dormer with timber cheeks is now proposed at the front along with a rooflight, which is considered a more appropriate solution for both the property and the conservation area.

The rest of the proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The proposals are not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will they have any impact on either of the immediate neighbours.

The proposals will not prejudice the outcomes of a Local Planning Brief (LPB) and would not inhibit the implementation of an LPB.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
