Policies considered most relevant:

GP8: Design

GP13: Householder development

MC10: Harbour Action Area

Conclusion/Brief comment:

The proposed new signage is located along the edge of the quay, and will be visible mainly from the water and adjacent piers which is necessary given its purpose. The "Boatworks.gg" sign has been reduced by 1m in width at the request of the planning officer, which improves the visual impact of the signs in combination.

The impact on the Conservation Area is not considered harmful, despite the size of the signs as views will predominantly be across the width of the harbour and against the building and sea wall. The presence of masts and boats, albeit variable at different times of year and tide, would assist in breaking up the visual impact.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The application is acceptable in relation to the above policies and other material planning considerations.
