OFFICER'S REPORT

Brief Description of the site:

The property known as 'La Rade' is a 1970's one and a half storey dwelling which sits in the middle of the site, set back from and facing southeast onto Rue des Rocques, with a flat roof garage attached to the southwest elevation. There are residential neighbours to the southwest and across the road to the southeast, and agricultural land to the northwest and northeast.

Conclusion/Brief comment:

This application is to demolish the garage and replace it with a one and a half storey extension to the southwest elevation, incorporating dormer to front and first floor

flat roof extension to the rear, and a single storey flat roof extension to the northwest elevation.

The proposed extension will be a minimum of 1.2m away from the southwest boundary, allowing pedestrian access around the whole property. The new southwest elevation of the proposal will only have one ground floor window to minimise possible overlooking.

The first floor has two existing windows, so there is already an element of overlooking into the neighbours garden to the northwest. The additional rear rooflight serves a landing area and views from this towards the neighbour will be blocked by the proposed extension to the west preventing overlooking into the adjoining private amenity space. It may give some overlooking into the garden to the rear, but this is not the most private part of the garden. On balance the rooflight is considered to be acceptable.

On the whole the proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours subject to a condition requiring the first floor windows to the rear being obscure glazed.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
