Conclusion/Brief comment:

This application is a variation of a previously approved scheme, the variation is to increase the width of the first floor balcony by 1.45m at the northwest end and 3m at the other end of the northeast facing first floor balcony.

The 1.45m extension will not impact on any nearby neighbouring property and is considered acceptable. The 3m extension will enlarge the balcony towards the closest neighbours, but there is a 2m privacy screen attached and that combined with the oblique angle and distance to the boundary the extension is considered to be acceptable.

The proposals achieve a good standard of design, using materials which complement the existing materials. The scale and massing of the new balcony extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
